Top Hat Covers

Folded top hat covers provide a raised central cover and fixing flanges for service runs. Specify the clear space required around the services and the access needed for the installation.

Profile schematic only. NOT TO SCALE.

Confirm all dimensions and fold details on the project drawing.

Product specification

Selection	Available specification
Stainless options	304 stainless steel; 316 available
Other materials	Galvanised steel or powder-coated aluminium options
Form	Raised central face with fixing flanges
Thickness	Confirmed for the selected material and profile

Profile and construction notes

The stainless reference drawing Top Hat Cover Rev01 shows 2 mm 304 sheet. It uses variable profile dimensions; 2 mm is a reference specification, not the only available thickness.

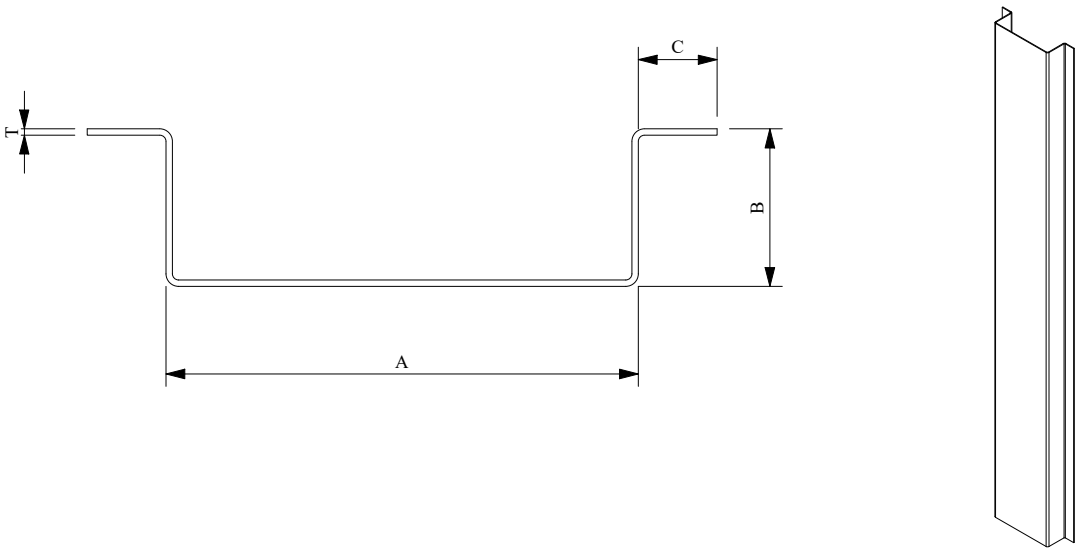

Mounting and interfaces

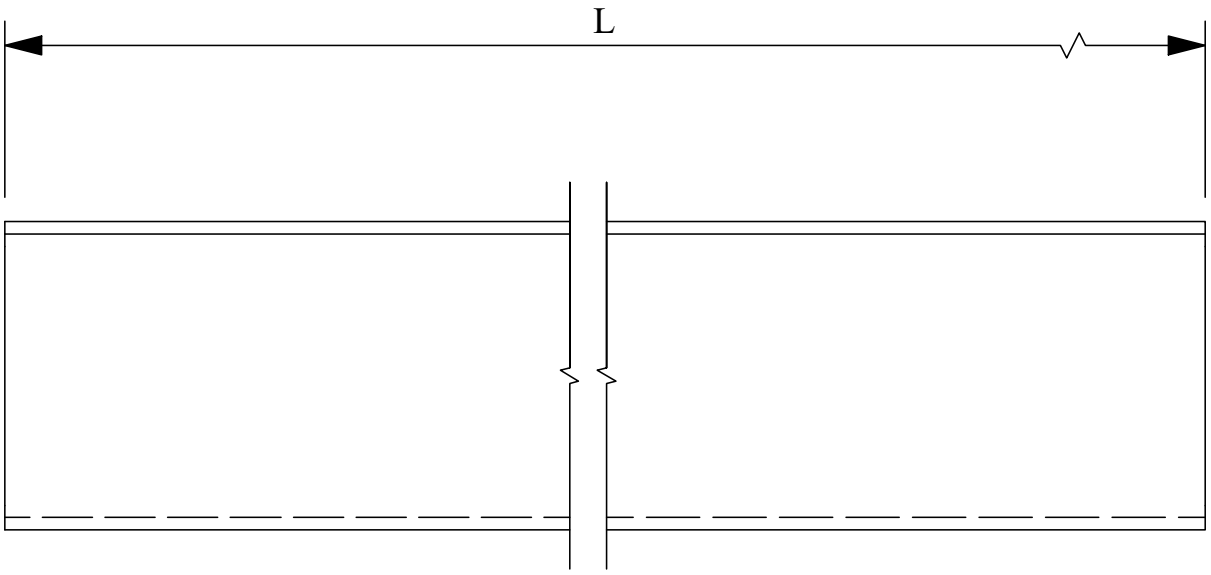

Confirm service clearances, access and fixing details. Overall profile size and internal clear dimensions are different measurements; show which dimensions your sketch specifies.

Images are for visual reference only. Actual products and selected options may vary. Refer to the confirmed specification and approved project drawing.

Top Hat Cover - Reference Views

All dimensions in mm. NOT TO SCALE - use stated dimensions.
Reference configuration only; confirm the selected project drawing before manufacture.

Source drawing notes

1. ALL DIMENSIONS IN MM UNLESS NOTED OTHERWISE
2. REMOVE ALL SHARP EDGES AND DEBURR HOLES
3. SURFACE FINISH N10 UNLESS SPECIFIED OTHERWISE
4. DRAWN TO AS 1100

Dimensions and Ordering

Top Hat Covers | All dimensions in mm

Your project schedule

Information	Requirements to confirm
Quantity and location	Quantity: Location: ____ _____
Overall length L	_____
Required internal clear width	_____
Required internal clear depth	_____
Flange widths, each side	_____
Material and thickness	_____
Fixing-hole diameter and positions	_____
Fixing and supply scope	State holes, fixing components and site work required

How to specify

Marko Stainless & Aluminium Top hat cover, [material], [length], [internal clear width and depth], [flange widths], [thickness], [finish], with [fixing requirements] to the confirmed drawing. Refer to MARKO-TH-SG R02.

What to include with your enquiry

Send a dimensioned sketch, quantity, material and finish selection, site photos if useful, and the relevant wall or floor construction. Identify any required performance and the components you expect to be included. We will confirm the supplied configuration with your quotation.

Before ordering

Check final dimensions, interfaces and selected options against the quotation and project drawing. This family sheet supports product selection; it is not a fabrication or installation drawing and does not replace project-specific approval.

Care: use guidance suitable for the selected material, finish and complete assembly. Aluminium, anodised and coated surfaces need their applicable care instructions; do not apply stainless steel cleaning advice automatically.
