CT2 Craft Trough

Flushline craft trough with a rear hob for trough-mounted tapware.

Representative centre-outlet CT2 body. Tapware and plug and waste are not shown. NOT TO SCALE.

Product details

Item	Selection information
Material	304 grade stainless steel with No. 4 finish. Confirm sheet thickness for the selected project.
Size selection	Length to suit your requirements. Confirm finished length, width, depth and rim projection with your quotation and project drawing.
Flushline installation	Overfolded rim for benchtop seating. Confirm the joinery cut-out, support and fixing access separately.
Tapware	Rear hob for trough-mounted tapware. Specify the tapware models, quantities and mounting requirements.
Outlet and waste	Centre outlet with a cross-braked floor and pressed seat for a plug and waste. Confirm the fitting, connection and supplied components with your quote.
Supply options	Bare or pre-plumbed options. State any requested benchtop, splashback or other adjustments for review.

Standard or made to order: Choose from our standard range, or have a custom length made to order. We fabricate our troughs in our workshop and can discuss adjustments to suit your project. Final dimensions, feasibility and inclusions are confirmed with your quotation and project drawing.

Request a quote: State the model, quantity, dimensions, outlet, tapware and required inclusions. Provide the bench and plumbing information available for your project.

Before ordering: Confirm all selections against the quotation and project drawing. This sheet is not a cutting, installation or fabrication template.
