3740 PAA Trough - 2400 mm

Practical activities area trough for inset / flush-line installation in a cupboard or bench.

Overall dimensions: 2400 × 440 × 185 mm (L × W × D)

Representative bare-trough render. Optional fittings are not shown. NOT TO SCALE.

Standard or made to order

Choose from our standard range, or have a custom length made to order. We fabricate our troughs in our workshop and can discuss adjustments to suit your project.

Custom lengths and other adjustments require feasibility and quotation confirmation.

Product details

Item	Specification
Model	3740 PAA practical activities area trough
Material and thickness	304 stainless steel; nominal 1.2 mm
Finish	No. 4 finish
Installation	Inset / flush-line; confirm support and fixing details for the installation
Waste and overflow	Plumbed overflow beside the centre tap on the hob for indoor PAA/classrooms, using a 40 mm nominal plug and waste fitting. Confirm primary waste, overflow pipework and joinery cut-out before manufacture.

What is supplied

Supply option	Description
Bare trough	Without fitted tapware; waste, overflow and fixings as quoted.
Pre-plumbed options	Available to suit project requirements. Confirm the included components with quotation.

Other options: benchtops, splashbacks, frames or legs, subject to quotation.

How to specify: 3740 PAA trough, 2400 × 440 × 185 mm, bare or with pre-plumbed options. State quantity and project requirements.

Before ordering: confirm final dimensions, connections and installation details against the approved project drawing. This sheet is not a cutting or fabrication template.
